

blood drum spirit

blood drum spirit is an American Jazz quartet that brings a new global vision to music, exploring the world's great traditions through the prism of live performance and working for universal consciousness, connection, and change.

...time always moves on and we change. What has not changed – if anything it's stronger – is **Blood Drum Spirit** and **royal hartigan's** dedication to, love for, and continual exploration of world music and how it is so much a part of jazz.
